

MATH MADNESS TO MATH MEANING:

Thinking Differently About Math

Teachers will discover different ways of thinking about & teaching math pertaining to subtraction, halving numbers, converting mixed numbers to improper fractions, percentages being reversible, multiplying using rectangles, long division meaning, adding/subtracting integers, subtracting/multiplying/dividing fractions, solving equations with rectangles or Desmos, & making math more visual. Teachers will also learn about various social media resources that encourage Ss to think about math differently.
