NOTICE.

In districts having two or more buildings and a superintendent, only one copy is to be made by the principal of each building and filed with the superintendent, who is to consolidate the several reports and make two copies of the same and file with the county superintendent at the close of school.

Teachers are requested to fill out each item of this report. This is the initial report for data that is consolidated for the State and forwarded to the U.S. Commissioner of Education. Much depends upon the accuracy of your answers.

This information is to be collected by the principal or the teacher in charge of a building from the teachers under his supervision and summarized in this report.

From the several buildings the reports are to be embodied in one report by the Superintendent who is to send two copies to the County Superintendent of Schools on or before July 15th.

Teachers are requested to fill out each item of this report. This is the initial report for data that is consolidated for the State and forwarded to the U. S. Commissioner of Education. Much depends upon the accuracy of your answers.

TEACHERS' ANNUAL REPORT

SCHOOL YEAR OF 1918-19

To the Teacher or Superintendent: The State and National authorities need and demand all the data called for in this report. You are rendering a valued service by a careful and prompt filling out of each item. For common schools of one teacher, items with starred numbers only are to be filled. In schools of two or more teachers the data should be collected by the Superintendent or Principal and embodied in one report. Two copies are to be filed with the County Superintendent within one week after the close of school.

TEACHERS' ANNUAL REPORT

SCHOOL YEAR OF 1920-1921

To the Teacher or Superintendent: The State and National authorities need and demand all the data called for in this report. You are rendering a valued service by a careful and prompt filling out of each item. For common schools of one teacher, items with starred numbers only are to be filled. In schools of two or more teachers the data should be collected by the Superintendent or Principal and embodied in one report. Two copies are to be filed with the County Superintendent within one week after the close of school.

TEACHER'S ANNUAL REPORT

SCHOOL YEAR 1943-1944

To the Teacher or Superintendent: The State and National authorities need and demand all the data called for in this report. You are rendering a valuable service by a careful and prompt filling out of each item. For common schools of one teacher, items with starred numbers only are to be filled. In schools of two or more teachers the data should be collected by the Superintendent or Principal and embodied in one report. One copy is to be filled with the County Superintendent within one week after the close of school.

Teacher's Annual Report

TEACHER'S ANNUAL REPORT

SCHOOL YEAR 1945-1946

To the Teacher or Superintendent: The State and National authorities need and demand all the data called for in this report. You are rendering a valuable service by a careful and prompt filling out of each item. For common schools of one teacher, items with starred numbers only are to be filled. In schools of two or more teachers the data should be collected by the Superintendent or Principal and embodied in one report. One copy is to be filled with the County Superintendent within one week after the close of school.

Teacher's Annual Report

Building is in Township 12 Range 6

School closed May 28

District No. 4 Marendam Cour Illinois, for school year ending June 30, 1947.

TEACHER'S ANNUAL REPORT

SCHOOL YEAR 1947-1948

To the Teacher or Superintendent: The State and National authorities need and demand all the data called for in this report. You are rendering a valuable service by a careful and prompt filling out of each item. For common schools of one teacher, items with starred numbers only are to be filled. In schools of two or more teachers the data should be collected by the Superintendent or Principal and embodied in one report. One copy is to be filed with the County Superintendent within one week after the close of school.

For the year ending June 30, 1917.

For the year ending June 30, 1917.

For the year ending June 30, 1917.

This report was made out by

County Superintendent.

Superintendent of Public Instruction.

LILINOIS PHINTING CO., DANVILLE, ILL.

INSTRUCTIONS

The superintendents or principals of districts or townships maintaining a high school of one or more years are to fill out this blank in duplicate; one copy to be filed with the school records, the other copy forwarded to the county superintendent, who shall transmit the same to the Superintendent of Public Instruction by July 1.

Especial care should be taken in preparing the various items, as follows:

Item 6.—Note that the number of units of work, not years of work, is to be given.

Item 7.—The salaries of all persons doing any high school work must be charged in full to the high school:

Item 8.—No teacher should be counted more than once.

Item 12 (a).—This should be left blank when the same building is occupied by both high school and grades.

Item 12 (b).—Should always be filled in.

Items 15-17. In case the high school and the grades occupy the same building, the amount to be apportioned to the high school may be estimated by noting the proportional amount of floor space occupied by the high school. The number of class-rooms occupied by the high school and the grades, respectively, often affords a convenient method of obtaining the proportion desired. In case this method proves inexpedient, a division based on relative attendance will be acceptable.

December 37, 1030

#4

Doord of Edwation, Elementary School District, Vitdon, Illimois.

Dear diret

December 10th, in commany with County Superintendent Wilhite, a brief inspection of your elementary tohools was made. Since our virit of last year an emount equivalent to \$100 has been opent or will be spent this year.

It was disappointing that the walls and ceilings at the Central building have not been redecorated but I hope this will be done during the next summer vacation.

To found no room over crowded. In fact the enrollment in culto's number of your rooms is very small in comparison with the enrollment of years ago.

Be found good order in all of the rooms and a splended quirit of cooperation on the part of Eupevintendent Thappen, teachers and children. You are having a successful year.

Sincerely yours,

Assistant Superintendent

SHIP HANG

February 23, 1944

Members of the Board of Directors School District #7 Virden, Illinois

Gentlemen:

On the fifteenth of January I visited the Union School, District #7. Your teacher, Mrs. Merril Sprague, is very well qualified for her work. I think she is doing an excellent job and I hope you will be able to retain her as a teacher, as it is not an easy matter to get experienced teachers at the present time.

I want to congratulate you upon the way you have kept your school on the recognized list. You have a very well equipped school, and I am sure it meets the needs of your community. The furnace and electric lights are a very valuable addition; the children appreciate them, I know. I am also glad to know that you have purchased the Pupils' Reading Circle books from the State Reading Circle Board. I hope you will order them every year, as they are the cheapest and best books that you can buy.

There are a few suggestions that I would like to make, so that when you get the money you will be able to take care of them. You need about a half dozen book-size dictionaries. These should be purchased as soon as possible. You also need a set of physiology charts as an aid in the teaching of health. A work table and some small chairs would be a great help to the little folks in their construction work. A few pictures would help in decorating the room.

Your floors are in bad shape, and I suggest that you have them resanded and then sealed and waxed. This will make it much easier to keep them clean. The roof has a small leak in it which should be repaired, or, if possible, a new roof should be put on the building. I also have a report from the Department of Health regarding your well. It seems as though this is one of your big problems, and should be taken care of at once.

Very truly yours,

I. K. Juergensmeyer County Superintendent of Schools

	NALYSIS OF WATER FROM. dug well, pump, Union				SCHOOL	SUPPLY
Date collected	November 16	, 1943				
Collected by	H. C. Kraus	•	For		· · · · · · · · · · · · · · · · · · ·	
Remarks	"taste? iro	n*?				
	Laboratory No	272889			7187	12021222
	Sediment				752/1 10.	
	Turbidity	0		/		C. C. C.
	Odor	0			22	
	Nitrite nitrogen	······			E War	
	IRON CHEMBEI	,70				15
	Bacteria per ml.	2400				9126
	Coli-type bacteria:					
	In portions of	10 ml.				
	Presumptive tests					
	Confirmatory tests	5+				

The above analysis indicates that the water was contaminated and was unsafe for drinking purposes at the time of sample collection. This well appears to be properly located and constructed and should be expected to deliver a water of safe quality. Towever, constructional contamination may have been introduced into the well at the time of construction. Therefore, we recommend that the well be again sterilized with strong solution of chlorine as outlined on page 23 of the well bulletin being sent to you under separate cover. After the chlorine is added to the water the pump should be operated until the odor of chlorine is detected from the pump. It should then be left idle for a period of eight hours, after which the water should be pumped to waste until the odor has completely disappeared. You may then request another sample container for a check analysis from the Department of Public Health, Division of Sanitary angine-ring, Springfield.

Number per 100 ml. (M P N)___

CONCERNING THIS SANITARY ANALYSIS

The statements on the reverse side are based not only on the analytical results, but also on the description of the source as furnished by you or already on file in this office. It is further recommended as follows:

- (a) If the water is unsafe to drink, abandon the supply for one of known safety or bring the water to a boil before use, until the suggested improvements have made the supply safe.
 - (b) If the source is not satisfactory, make the suggested improvements immediately.
 - (c) If the water is safe, take care to keep it safe by protecting the supply against contamination.

A laboratory examination of the water has been made to show the presence or absence of waste matter of human or animal origin. If the water is contaminated by surface wash or sewage, then parasitic intestinal worms, amebic cysts or germs of intestinal diseases, such as cause bowel complaint, diarrhea, dysentery or typhoid fever, may be present in the water, thus endangering the health of persons drinking the water. The analytical terms and results are briefly explained as follows:

Physical and Chemical Tests: "Sediment" through "Chloride." A desirable water has an attractive appearance (no sediment or turbidity) and has no objectionable odor or taste. Chemical results are given in parts per million (ppm).

Bacteriological Tests: "Bacteria per ml." indicates the number of microörganisms present in one milliliter (ml.) of water (20 drops) and the number which grew in standard nutrient agar at body temperature (37°C or 98.6°F). These bacteria may not be of intestinal origin and therefore may not be of sanitary importance. Occasionally the test plates are overcrowded so that no bacterial count can be obtained. In such a case the report shows "Innumerable" indicating more than 10,000 bacteria per ml.

"Coli-type bacteria" "Presumptive Tests" "Confirmatory Tests": A water containing bacteria of intestinal origin (E. coli and A. aerogenes, also known as "coliform" bacteria), if placed in a sugar broth (lactose), will cause fermentation and production of gas in 24 or 48 hours. By means of further laboratory tests the presence of these bacteria in 10 ml. portions is indicated by a +, their absence by a -. The numeral preceding the sign shows the number of portions giving that result.

Example: 2+3— indicates that two 10 ml. portions of the sample did show and three portions did not show coli-type bacteria present.

After receipt of the sample in the laboratory it requires from two to six days to complete the sanitary or bacteriological analysis.
