With the help of the Illinois State Police, teachers will learn about STEM careers connected to police work involving crash reconstruction & crime scene investigation. Master Sergeant Bradley Brachear & Acting Master Sergeant Leslee Nissen, from the Illinois State Police, will lead a live presentation sharing what they do, qualities/skills/training needed for the job, how math & science is applied in their field, what technology is used, how they got interested in pursuing their careers, and suggestions for teachers on how they can help introduce or prepare students for the career, activities, etc. Following the presentation, time will be given for teachers to ask questions. Don't miss this great opportunity to increase your knowledge & take back what you learn to broaden your students' knowledge of class to career connections!
